

## CURVED AMNIOTIC HOOKS

Curve-Hook Anatomically Shaped Amniotic Membrane Perforator.

The Curve-Hook is anatomically shaped to make the hook more versatile and easier to use. The Curve-Hook has been designed to make the membrane easily accessible.

The design ensures optimum efficiency and the prevention of injury to the patient when used.

The shaped rounded tip and protected hook simply engages and ruptures the membrane, saving the need to prod or puncture, therefore reducing any chance of injury to the foetus.

Pat Coakley Medical

- Individually supplied sterile in easy to open packs
- Latex-Free
- UK Manufactured
- CE Marked
